

## CR 1.10 SNA add EAC-CPF in the value list for MDTYPE

### Summary of change request:

EAC-CPF was released in March 2010. During 2011 SAA adopted EAC-CPF as a standard they support. Therefore it seems reasonable to add “EAC-CPF” as a new value to the value list for the MDTYPE attribute.

### Use case:

1. Referencing an EAC-CPF file as a MDTYPE in dmdSec.

### XML-example

- 1.

```
<dmdSec>
  <mdRef LOCTYPE="URL" MDTYPE="EAC-CPF" MIMETYPE="text/xml"
    SIZE="23" CREATED="2011-10-20T16:15:00" xlink:type="simple"
    xlink:href="http://www.riksarkivet.se/archival_context/eac-cpf-file-123.xml"/>
</dmdSec>
```
